

SIT IN THE SPOTLIGHT

with 30+ hours Masterclass on Soft Skills

Manju's Tryst with Ties

Manju, a final-year student in a BTech course,

aced the aptitude round in the campus placements & was excited about the personal interview rounds.

As Manju started getting dressed, his friend, Harish, saw him and said, "Bro, what are you wearing? Why are you wearing slippers with a formal shirt, and why is your tie not tied properly?"

Listening to Harish, Manju dressed appropriately for his interview. At the interview, the interviewer was impressed by Manju's personality, and behaviour and by the end of the day he had a job offer in his hand.

Not everyone has a friend like Harish who can help you discover little things that can improve your soft skills.

The National Association of Colleges and Employers lists "Communication & Soft Skills" as the most sought-after soft skill by employers, even ranking higher than critical thinking and problem-solving.

Source(NACE) 2023 Job Outlook

73% of talent professionals consider "communication & soft skills" as critical for hiring decisions.
